1	⊟ Ty (iOS)																														
2	Facial Recognizer (2 weeks)																														
3	Home Screen								Home Screen																					
4	Home Screen Functionality														Home Screen Functionality															
5	Test and make bug fixes																													
6	⊟ Cole (Chief Architect)																														
7	Design how blockchain will work																													
8	Scanner Functionality (2 weeks)																													
9	Figure out how blockchain communicates														Figure out how blockchain communicates															
10	Compare Driver Image w/ Face																					Compare Driver Image w/ Face								
11	⊟ Josh (QA)																														
12	Test Machine Learning																													
13	Become Blockchain Consultant														Become Blockchain Consultant															
14	Test Blockchain security																													
15	⊟ Trevor (Blockchain)																														
16	HTTP Endpoints for moc chain														HTTP Endpoints for moc chain															
17	Implement security features of blockchain																													
18	⊟ Jaz (PM and Tools)																														
19	Create tool for generating keys														Create tool for generating keys															
20	Moc Chain API Docs																					Moc Chain API Docs								
21	Create tool for testing security of the blockchain

Ty (iOS)

Facial Recognizer (2 weeks)

Test and make bug fixes

Cole (Chief Architect)

Design how blockchain will work

Scanner Functionality (2 weeks)

Josh (QA)

Test Machine Learning

Test Blockchain s

Trevor (Blockchain)

Implement security features of blockchain

Jaz (PM and Tools)

Create tool for testing security of the blockchain
